Super Adapt Technology Powers Dahua HDCVI Cameras

Overview

As a pioneer in the HD-over-Coax industry, Dahua introduces the Super Adapt technology. It can accurately recognize if the monitored scene is indoor, outdoor or under wide dynamic range, and automatically adjust the image settings to provide users with optimized image performance in various surveillance scenarios.

Applications

In indoor scenarios, Super Adapt technology can improve the brightness of dark areas to capture clear details of targets such as human faces.

In outdoor scenarios, Super Adapt technology can automatically adjust camera parameters for balanced lighting, thereby improving image performance.

User Benefits

For end users

Automatic scene adaption benefits users with optimized image performance.

For installers

No need for manual image adjustment, saving camera debugging time and costs.

Recommended Models
